KeySafe Pro Permanent - Compact Slimline design with pushbuttons

Overview

The KeySafe Pro Permanent Slimline provides convenient, managed access to stored keys (max. 2). The small and rounded design makes it well accepted from a designer point of view and makes it suitable for residential and small business applications. Available in multiple neutral colours. The code can be changed anytime for added security.

A durable weather cover is available to prevent water intrusion and to hide out of sight.

Construction and installation

The KeySafe is made of zinc alloy with a powder-coat finish. It attaches securely to any wall or flat surface with 4 screws (not provided; type depending on wall material). Proper installation is important for security reasons.

Operation

Slide the 'Clear' switch down to reset the buttons. Push the appropriate combination code. Press down the 'Open' switch and remove the lid. After use of the key, enter the code again, press down the 'Open' button and place the lid back. Release the 'Open' button and the lid will be locked.

Applications

Residential applications: children get home, unattended servicing, spare keys, more secure storage of hidden keys, emergency entry, vacation homes,...

Business applications: alarm & emergency entry, office keys, access on construction sites, home healthcare access, property management, remotes sites,...

Standard Features

- Easy-to-use keybox
- Small slimline design
- Change combination as often as needed - 1024 different combinations possible
- Holds up to 2 keys
- Security level appropriate for residential & small business applications

Operating Temperature	-32 to +68 °C
Cycling Temp/Humidity	6 days exposure
Salt Fog	48 hours
Water Resistance	10.16 cm/hr exposure
Snow/Ice	-26°C
Resistance against chemicals/cleaners	Standard household chemicals
UV exposure	Long-term sunlight exposure

Guidelines

We recommend that your KeySafe is fitted in a covert position if at all possible.

When programming your access code, we recommend that you NEVER use a birth year or other obvious combination code. A combination consisting of between 5 and 7 digits is recommended.

We recommend that you fit your KeySafe to brickwork or concrete areas as opposed to wooden surfaces. Please remember that KeySafe is a convenience product, not a security product.
